

THERE MAY BE NO FREE LUNCH, BUT THERE ARE FREE WATERBROOMS WORTH UP TO \$350

Businesses Can Now Reduce High Water and Energy Bills with FREE Waterbrooms

Carson, CA– For a limited time, until May 30, 2008, local businesses that currently clean concrete, asphalt, or other hard surfaces with a pressure hose or high water usage spray nozzle can get a free Watermiser™ Waterbroom valued from \$250.00 to \$350.00.

West Basin Municipal Water District (“West Basin”) in conjunction with the Water Replenishment District of Southern California is giving away free Waterbrooms through the South Bay Energy Savings Center. The device uses as little as 2.0 gallons per minute verses 6 to 18 gallons per minute for a hose and nozzle, power washer or other similar technologies. If your business is trying to find easy ways to be green, the Waterbroom is environmentally-friendly, using less water and reducing the amount of runoff that drains to the ocean.

The lightweight Waterbroom cleans faster than a hose, power washer, or broom reducing the chance of slipping and falling because the air water technology dries in minutes. It cleans up dust, dirt, food spills, litter, sawdust, bird droppings, leaves and other messes in 75% less time; air and water pressure do all the work. The Waterbroom also comes with a 5-year warranty on parts and labor.

To be eligible for a free Waterbroom, a business must be using the Waterbroom to replace an existing pressure hose or high water usage spray nozzle, and reside in Carson, El Segundo, Gardena, Hawthorne,

Hermosa Beach, Inglewood, Lawndale, Lomita, Manhattan Beach, Palos Verdes Estates, Rancho Palos Verdes, Redondo Beach, Rolling Hills, Rolling Hills Estates, Torrance, or be a Southern California Edison or Southern California Gas Company customer in San Pedro or Harbor City. Businesses must apply to the South Bay Energy Savings Center by no later than May 30, 2008.

The Waterbroom will be given out on a first-come, first-served basis. To obtain a free Watermiser™ Waterbroom, call the South Bay Energy Savings Center at 310-543-3022 or go to www.sbesc.com.

The mission of the South Bay Energy Savings Center is to serve the region's constituents as the central clearinghouse for energy-efficiency information and resources, and significantly increase the availability of information and resources to the people in the South Bay region to help them save energy and save money.

West Basin Municipal Water District is committed to improving local water reliability through water recycling, water conservation, and developing other alternative water supplies. West Basin is a recognized leader in the production of recycled water, has won several awards for its leadership, planning and design of its recycled water facility, and supplies 30 million gallons of recycled water throughout the South Bay each day, replacing enough precious drinking water to supply 60,000 households annually.
